EDUCATION

University of Toronto **Toronto, ON**

Master of Engineering, Electrical & Computer Engineering Expected September 2027

- Director of Academics, Google Developer Group; Vice President, ECEGSS; GSU Council Representative.

McMaster University **Hamilton, ON**

Bachelor of Technology, Software Engineering Technology August 2026

- Founder & President, McMaster Open Source Society, Student Representative Assembly Representative.

PROFESSIONAL EXPERIENCE

Ontario Lottery and Gaming Corporation (OLG) **Toronto, ON**

AI Systems Engineer Intern January 2026 – August 2026

- Developed computer vision pipelines integrating TensorFlow, YOLOv8, MediaPipe, and MoveNet for real-time behavioural analysis and safer gambling applications.
- Engineered AI-driven self-healing workflows integrating Dynatrace and Playwright to automate failure detection, root-cause analysis, and remediation of gaming application failures.
- Automated CI/CD and deployment validation using Microsoft Azure across 25+ enterprise releases, reducing manual verification effort by approximately 35%.
- Maintained enterprise AI platforms across Linux and Windows, troubleshooting integrations and improving application reliability.

Ontario Ministry of Transportation (MTO) **North York, ON**

Software Engineering Associate May 2025 – December 2025

- Developed automated testing tools and CI/CD pipeline components for enterprise Laboratory Information Management Systems (LIMS), reducing manual testing effort by approximately 75%.
- Validated enterprise LIMS functionality, data integrity, and accessibility compliance (AODA/WCAG), achieving a 98%+ test pass rate.

Kinectrics **Etobicoke, ON**

Systems & Automation Engineering Student January 2023 – April 2023

- Developed PowerShell-based automated system validation workflows, reducing execution time by approximately 30% and manual effort by 25%.
- Identified and resolved system-level vulnerabilities and configuration issues through automated scanning and validation, reducing exposure by ~30%.

TECHNICAL PROJECTS

Real-Time Computer Vision & Behavioral Analysis System

Python, YOLOv8, OpenCV, ByteTrack, PyTorch

- Built a real-time multi-person tracking and behavioral analysis pipeline combining pose estimation, activity recognition, facial analysis, and temporal event detection.
- Implemented per-person state management and benchmarked MLP, MobileNetV2, and S3D activity classifiers to evaluate classification accuracy and inference latency.

Multi-Agent LLM Chatroom

TypeScript, React, Node.js, Express, PostgreSQL, REST APIs

- Developed a full-stack multi-agent LLM chatroom orchestrating multiple AI models through independent reasoning, cross-agent critique, and consolidated summaries.
- Engineered a secure Express API gateway with request validation, rate limiting, PostgreSQL usage analytics, and token consumption monitoring.

Course Availability Monitoring & Notification System

Python, JavaScript, Chrome/Firefox Extensions, Automation

- Developed an open-source course monitoring platform with real-time seat tracking, historical availability visualization, and configurable browser-based alerts.

SKILLS & DISTINCTIONS

- Languages & AI/ML: Python, C++, C#, TypeScript, JS, PyTorch, TensorFlow, OpenCV, MediaPipe, YOLOv8.
- Systems & Cloud: Microsoft Azure, Linux, CI/CD, Git, PostgreSQL, REST APIs, FreeRTOS.
- President's Honour List: Winter 2022, Summer 2022, Fall 2023, Winter 2024.
